PROJECT DETAILS

❖ Mobile App Development

⌚ Jul. 2021 - Dec. 2021

💵 \$50,000 to \$199,999

“

"I liked their techno-commercial mindset and commitment – they worked seriously as if it's their own project."

PROJECT SUMMARY

Appers for Cloud Services & Data Center Providers helped a smart building company develop a mobile application for automated buildings and hotels. They focused on the admin dashboard and alarm panel.

PROJECT FEEDBACK

Appers for Cloud Services & Data Center Providers successfully fulfilled all integration requirements, addressed all concerns, and added valuable features during the development phase. A committed team, they assigned two points of contact, which saved time and ensured seamless collaboration.

The Client

Please describe your company and your position there.

we are an international company specialized in smart buildings with projects in over 50 countries worldwide.

 Country Manager,
Vimar SPA

 Riyadh, Saudi Arabia

The Challenge

For what projects/services did your company hire Appers for Cloud Services & Data Center Providers, and what were your goals?

We needed a professional and optimal solution for our enterprise partners to have smart buildings and hotels fully automated and controlled through a mobile app platform, we selected Appers after a long procurement process.

The Approach

How did you select this vendor and what were the deciding factors?

We had a tough procurement process where we the vendors must provide a real time demo on the proposed solution, Appers went above and beyond the expectations in terms of the solution proposed and the cost expectations.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

Mobile App development using Flutter Super Admin and Backend Integration with sensors and connectors Admin Dashboard and alarm panel for notifications

How many resources from the vendor's team worked with you, and what were their positions?

- Project Manager
-
- 2 frontend developer
-
- 2 backend developer
-
- Integration engineer
-
- AI/OT engineer
-
- UI designer
-
- UX designed
-
- 2 QA members
-

The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

There were multi-layer integration requirements along with new requirements appeared during the development phase, appers helped in addressing all of these concerned and the focus was to provide an added value solution regardless of the agreed SOW.

Describe their project management style, including communication tools and timeliness.

What I liked the most that we had 2 points of contacts only which saved us a lot of time, the project manager and the customer success manager

What did you find most impressive or unique about this company?

I liked their techno-commercial mindset and commitment – they worked seriously as if its their own project.

Are there any areas for improvement or something they could have done differently?

After a successful experience with them, I think they should look more into OT projects as it's the future.
